SIMPLE SPLURGES

Let there be light

One less thing to feel guilty about! If you love to read in bed but the light bothers your snoozing bedmate: The **LightWedge** has a clear surface that delivers bright, concentrated illumination on just the page itself. It's thin enough to use as a bookmark too. (\$35, 877-777-9334 or www.barnesandnoble.com; a smaller version for paperbacks is \$25)
